

## TSCA Section 6 — Chlorinated Solvent Use Certification

*Methylene Chloride (DCM) — Final Rule under the Toxic Substances Control Act*

Dear Customer: USEPA has issued a final rule under TSCA Section 6 significantly restricting **methylene chloride** until potential phase-out. The few uses that may continue require a Workplace Chemical Protection Program (WCPP). USA Lab will comply with the rule and will not manufacture, process, or distribute methylene chloride for any prohibited use. Please review and complete the certification below; refer to the USEPA Fact Sheet for the full rule.

### APPROVED END USES UNDER THE FINAL RULE

After January 28, 2026, methylene chloride at  $\geq 0.1\%$  by weight may be distributed in commerce or processed **only** for the following purposes:

- (1) Processing as a reactant;
- (2) Processing for incorporation into a formulation, mixture, or reaction product;
- (3) Processing for repackaging;
- (4) Processing for recycling;
- (5) Industrial or commercial use as a laboratory chemical;
- (6) Industrial or commercial use as a bonding agent for solvent welding;
- (7) Industrial and commercial use as a paint and coating remover from safety-critical, corrosion-sensitive components of aircraft and spacecraft;
- (8) Industrial and commercial use as a processing aid;
- (9) Industrial and commercial use for plastic and rubber products manufacturing;
- (10) Industrial and commercial use as a solvent that becomes part of a formulation or mixture used inside a manufacturing process, where the methylene chloride will be reclaimed.

I certify that I have reviewed the USEPA TSCA Section 6 Fact Sheet and regulations for methylene chloride, and that the use(s) identified above for the product(s) listed are approved end uses under the final rule. I understand that USA Lab will not distribute methylene chloride for any prohibited use after the dates set in the final rule.
